Dommes Consulting, Inc (DCI) is a veteran-owned small business consulting firm specializing in providing high-impact solutions that streamline operations and enhance organizational efficiency. Our corporate experience championing information technology (IT) modernization programs is supported by a proven track record of successful project execution and a commitment to continuous improvement. Leading program initiatives along with assisting key partnerships has allowed the DCI team to apply cutting-edge technology, rigorous quality control processes, and innovative methodologies to deliver solutions that reduce costs and improve overall organizational success. We leverage our industry expertise to offer solutions tailored to client needs during initial implementation, and throughout long-term sustainment to help clients achieve mission success.

Why Choose DCI?

Deep Federal Expertise

Unique insight into how government and defense business operates — with proven success navigating federal regulations, compliance standards, and acquisition processes.

Trusted Professional Network

Access to a network of highly experienced industry and government experts, including original Navy ERP plank owners, ready to support complex mission needs.

Clear Technical Communication

Skilled at translating complex technical concepts into actionable, client-friendly language — enabling better decision-making across all stakeholders.

Proven Performance Record

Demonstrated history of delivering high-quality outcomes — on time, within budget, and aligned with mission priorities.

Empowered Knowledge Transfer

Strong emphasis on coaching and capacity-building during implementation and sustainment, ensuring long-term federal ownership and operational self-sufficiency.

Solving Tomorrow's Tech Challenges Today

DCI Consulting Capabilities

Core Expertise: Defense Business Systems (DBS) | Enterprise Resource Planning (ERP)

DBS & ERP Solutions: Specializing in **Defense Business Systems** and **Enterprise Resource Planning (ERP)** implementations and enhancements, with a proven track record supporting Navy ERP and related platforms.

Leading Federal IT Modernization: Championing transformational **Federal Information Technology (IT) modernization initiatives** that drive digital readiness, strengthen cyber resilience, and align with DoD digital transformation objectives.

Executive-Level PMO and Technical Leadership: Providing **Executive Program Management Office (PMO)** leadership and **technical oversight** to ensure seamless coordination across complex defense programs, delivering measurable outcomes on schedule and within budget.

Strategic Support Across All Echelon Commands: Proven experience supporting **Echelon I & II Command structures** — including **ASN(FM&C), PMA, PMS, PMW, and BSO organizations** as well as **Working Capital Fund activities** — with tailored leadership, advisory, and technical services aligned to mission-critical outcomes.

Financial Management and Federal Audit Readiness: Supporting robust **financial management operations** and ensuring audit readiness through compliant data practices, system transparency, and alignment with DCAA and Navy financial reporting standards.

Systems Engineering / DoDAF: Architecture design and system alignment under DoDAF standards.

Healthcare and other expertise...

Our services outside of defense business systems, focus on improving operational efficiency and adoption outcomes:

Federal Healthcare IT Solutions: Experienced **Super User and End User adoption services** including training content development and delivery, learning management system (LMS) requirements, subject matter expert (SME) integration, Go-Live support services, and sustainment transition strategy optimization.

Healthcare Business Office Support: Led **enterprise-wide transformation and operational improvement initiatives**, delivering project oversight, optimizing revenue through payer agreement strategies, and driving national healthcare integration—all while aligning outcomes with strategic goals and PMI best practices.

Federal Aviation Administration Program Management: aligned expertise in program management, strategic planning, and organizational development to support the FAA Surveillance Services PMO—leading initiatives to improve processes and define the future state of surveillance in the National Airspace System (NAS), directly influencing major investment decisions.
